SYNTHESIZERS • STAGE PIANOS • COMBO ORGAN
Handmade in Sweden by Clavia DMI AB
The Nord factory is located in the creative area of Stockholm also known as SoFo, in the district of Södermalm. With everything located in the same building, communication between development and production is only a matter of walking a few meters. We are proud to say all our Nord products are assembled by hand and they all go through a series of tough tests to ensure they'll be ready for a long and happy life 'on the road'.

IT ALL STARTED BACK IN 1983...

In 1983 founder Hans Nordelius created the Digital Percussion Plate 1 – the first drum pad allowing for dynamic playing using sampled sounds. The DPP1 was an instant success and soon thereafter the brand name ddrum was introduced. The innovative ddrum pads featured real heads and hoops and gained huge popularity – many people still regard them as the best digital drum triggering system around!

In 1995 Clavia released its first synthesizer, the Nord Lead. Its unique take on emulation of analog synthesis, combining a distinctive sound with an intuitive user interface made it an instant classic. Magnus Kjellander joined Clavia in '96 and brought with him a new approach to the company in terms of software design. The Nord Modular, released in 1997 was the first digital modular synthesizer, possibly the most flexible, innovative synthesizer that has ever been on the market.

In 2001 the first Nord Electro was released, introducing stunning emulations of classic vintage electro-mechanical instruments with a level of portability generally not associated with the original instruments...

The Nord Stage surfaced in 2005, combining many of Clavia’s new areas of expertise in one – acoustic and electric piano sounds, organ emulations, effects and even a synthesizer!

The Nord C1 Combo Organ saw the light in 2005, incorporating our 2nd generation tone wheel modeling, rotating speaker simulation, dual manuals and surprisingly lightweight (15kg). Nord Wave took the Nord Lead-concept to a new level in 2007 with its capability to use any audio file as an oscillator source in a virtual analog environment, combined with the compact, user friendly interface of a Nord product.

In 2008 we released the Nord Electro 3 and the exclusively licensed sounds from the Mellotron and Chamberlin. The Electro 3 became one of the most successful products we’ve ever made.

In 2010 the streamlined Nord Piano was introduced, a lightweight stage piano that featured advanced String Resonance and the unique Nord Triple Pedal with pedal noise.

We let the Nord Stage 2 out of the bag at NAMM 2011, sporting a new synth section sample playback support, more memory, the C2 organ simulation and the Nord Piano Pedal Noise. Nord Stage 2 raised the bar for how a Stage piano should sound and behave. 2012 was an adventurous year for us, with the launch of the Nord C2D, our first organ with physical draw bars as well as the virtual analog drum synthesizer Nord Drum. On top of that we also released the Nord Electro 4 family with the acclaimed Nord C2D tone wheel simulation and

introduced the **Nord Piano 2** that allowed splitting and layering sounds from the Nord Sample Library.

In 2013 we celebrated our 30th anniversary as a musical instrument company! We’ve come a long way from the little basement workshop we started out in back in 1983 – a journey fueled by curiosity, persistence, dedication and love for music!

**IT CAME FROM THE PAST..**

March 2013 we got a tip from a Swedish synthesizer web community about a man said to be in possession of an analog synthesizer rumored to have been hand-built by Hans Nordelius in the 70’s. It turned out to be correct and the synth and its creator were finally reunited after over 30 years apart! The synth needs some repair but its an impressive home build that definitely shares some DNA with the Nord Lead-series...

**COMPANY HISTORY**

- **2008**: Nord Lead Anniversary Model, Nord Electro 3, Nord Stage EX
- **2009**: Nord C2 Combo Organ, Nord Pedal Keys 27
- **2010**: Nord Piano
- **2011**: Nord Stage 2, Nord Electro 3 HP
- **2012**: Nord Piano 2, Nord C2D, Nord Drum, Nord Electro 4
- **2013**: Nord Lead 4, Nord Drum 2, Nord Pad, Nord Piano 2 HP
- **2014**: Nord Lead A1
NORD LEAD A1
THE NEED FOR SPEED

This is the new Nord Lead A1 analog modeling synthesizer – a stunning sounding synthesizer with a simplified yet hugely powerful front panel interface.

Producing stand-out sounds for live or for the studio, the Lead A1 is ideal for all musical genres. Thanks to its carefully thought-out user interface, the Lead A1 encourages experimentation, allows for far speedier programming than would otherwise be possible, and ultimately delivers sensational sonic results.

SOUND DEMOS

nordkeyboards.com/a1
OUR BEST-EVER ANALOG MODELING...

At the heart of the Lead A1 is our new analog modeling engine. Taking our virtual analog synthesis to the next level, this modeling recreates a total analog signal path with uncanny realism, and is capable of immense sonic variety. With 26-voice polyphony and four simultaneous synthesizer parts, the Lead A1 is a true synthesizer powerhouse that goes far beyond the current trend for limited capability analog reissues.

...COMBINED WITH OUR MOST INTUITIVE INTERFACE

Fundamental to the design of the Lead A1 is a brand new simple yet sophisticated front panel interface. The design is in fact the result of requests from professional players – even the most experienced programmers – who need to create the perfect sound as quickly as possible for today's live or studio time demands. The Lead A1 allows easy patch creation and experimentation thanks to a new and unique oscillator section, pre-programmed modulation matrix, and simplified ADR envelopes. Dive in and create incredible patches far quicker than would normally be possible with a synthesizer of such power.

HIGHLIGHTS

OSCILLATORS
- 8 Oscillator Configurations
- Pitch, Detune, Shape, Sync, AM, Noise, Sub Mix, FM
- Traditional Analog and Digital Waveforms

MODULATION
- LFO with 5 waveforms
- Mod Envelope

FILTER
- 12, 24 dB low-pass filters
- High-pass and Band-pass filters
- Transistor and diode ladder filter simulations of Mini and TB-303

EFFECTS
- Ensemble, Chorus, Phaser, Flanger, Ring Modulator, Drive

PERFORMANCE
- 4-part multi-timbral
- Master Clock Sync of Arpeggiator, LFO and Delay
- Velocity and Mod Wheel Morph
- USB MIDI

SPECIAL FEATURES
- Like Button
- Mutator
- Extra Fat Unison mode

Nord Lead A1 is also available in a table top version, the Nord Lead A1R. Rack mountable with rack ears (included).
OSCILLATOR Configurations

**Pitch** Adjusts the pitch of the original oscillator.

**Detune** Adds a second oscillator, with control over its pitch.

**Sub Mix** Adds a second oscillator, with a choice of waveform shapes and pitches.

**Shape** The shaping of the Panel Analog, Extended Analog and Fixed Pulse waveforms uses a traditional waveshaping method, the other waveforms are changed with a spectral shaping process.

**Sync** Emulates Hard sync by adding an additional oscillator that is the sync reference.

**FM** Oscillator 1 will be modulated by a sine wave from oscillator 2 at high frequencies. There are several different pitch offsets for oscillator 2 (-12 to +48 semitones).

**AM** Uses a second oscillator to create Amplitude Modulation.

**Noise** Adds a Noise element to the original oscillator, Osc Control sets the mix.

**Oscillator Section**

The Lead A1’s new Oscillator section generates 47 different waveforms from classic analog to digital harmonic and inharmonic waves, whilst unique Oscillator Configuration Shortcuts make programming more immediate than ever. Start with a single Oscillator waveform, select an Oscillator Configuration Shortcut - Pitch, Detune, Shape, Sync, Sub Mix, FM, AM or Noise - and use the Adjust knob to adjust the settings of the configuration. The end result is high speed programming without the need for the usual complexity of routing and patching, and with the opportunity for ready experimentation. A fast track to stunning sound design for both advanced and less experienced programmers.
SPECIAL FEATURES

LIKE BUTTON
Unique to the Nord Lead A1 is the new ‘Like’ function, a simple and brilliant practical feature to use during patch creation. When programming a patch it’s often not clear if it’s yet perfect. Now with the Lead A1 you can simply ‘Like’ what you’ve done into a temporary location and continue editing. You can Like up to 50 variations, with the ability to scroll between them to compare your favourites or go back to a specific Liked version to edit in a different way. When you’re ready, save your favourite patch or patches to the Lead A1’s memory.

MUTATOR FUNCTION
A popular feature of the Lead 4, the Mutator function allows variations of a patch to be created by adjusting one, some, or all elements of a patch by set percentages. There’s also a wild Randomize mode to create an entirely new patch with all parameters randomized.

FAT UNISON MODE
A newly designed “Fat-As-Fat-Can-Be” Unison Mode lets the Lead A1 challenge any vintage analog instrument.

FILTER SECTION
The Lead A1’s filter section features classic 12 and 24 dB Low Pass, a High Pass and a Band Pass filter, together with stunning emulations of the diode and ladder filters from the legendary Mini and the TB-303 synths as used in the Lead 4. The Lead A1’s modeling of these filters capture the true character and response of the originals, allowing supremely flexible and precise sound design. The filters are super-smooth with a warm analog character.

EFFECT SECTION
The Lead A1’s effects section features two stunning brand new analog models of an Ensemble and Chorus, modeled on specific vintage synths and adding classic warmth and analog feel. Alongside these, choose from great-sounding Ring Modulation, Phaser, Flanger, or Drive per slot, and in addition a separate Delay and Reverb for each slot.

LFO & MODULATION SECTION
The Lead A1 features an LFO with a choice of waveforms and a three-stage ADR/ASR Modulation Envelope. The LFO rate can be sync’d to the Lead A1’s master clock. The Mod Envelope has its own velocity setting and also includes an Invert function. Thanks to the intuitive design of the front panel it is very easy to see what modulations have been applied and to design incredible sounding patches.

FILTER SECTION
The Lead A1’s filter section features classic 12 and 24 dB Low Pass, a High Pass and a Band Pass filter, together with stunning emulations of the diode and ladder filters from the legendary Mini and the TB-303 synthesizers as used in the Lead 4. The Lead A1’s modeling of these filters capture the true character and response of the originals, allowing supremely flexible and precise sound design. The filters are super-smooth with a warm analog character.
ARPEGGIATOR
The Lead A1 features four separate Arpeggiators with Up/Down and Random modes and a 4-octave range. Any or all can be sync’d to the Lead A1’s master clock.

MASTER CLOCK
The Master Clock function of the Lead A1 allows the LFO, Arpeggiator and Delay to be synchronized, either internally or slaved to external MIDI clock. A Tap Tempo button allows you to easily tap to the tempo of a drummer or to playback tracks.

SPLITS AND LAYERS
Having four identical, equally powerful synthesizers at once opens breathtaking layering possibilities. The Split-mode gives you two 2 slots on each side of the split. A flexible Hold functionality lets you latch and hold slots independently in the background while playing something else on top.

MULTI FOCUS MODE
New in the Lead A1 is the Multi-Focus Mode that allows editing and control of all four slots simultaneously. Save this mode as part of a Performance and you have live realtime control over all four slots of the Lead A1.

MOD WHEEL AND VELOCITY MORPH
A classic Nord feature, the Morph function via Mod Wheel, Velocity or pedal, allows you to control multiple parameters of the Lead A1 simultaneously. Morph is exceptionally easy to set-up and use - just hold the Morph button and adjust any desired knob.

FOUR OUTPUTS
The Lead A1 features four independent audio outputs with the ability to route each slot to a different output. Plus control of Pan via the front panel knob is a welcome new addition in the Lead A1.

SOUND MANAGER
The Lead A1 includes the Nord Sound Manager software for OS X and Windows. Sound Manager is a dedicated librarian app which allows easy reorganizing, back-up an transfer of programs.

MIDI CONTROL
The Lead A1 features the convenience of MIDI over USB for use with a sequencer or with the included Sound Manager software. All of the Lead A1’s knobs transmit MIDI Control data.

OPTIONAL ACCESSORIES

SOFT CASE
Keep your Nord instrument in perfect shape with the ultimate soft case, featuring a plush interior, thick padding, and the distinctive Nord red color. The mid-sized pocket will hold all your cables and accessories. Carrying handles, shoulder strap, and two backpack straps lets you carry your instrument any way you want.

SUSTAIN PEDAL
Sustain pedal.

DUST COVER
Cover and protect your Nord unit with the matching Dust Cover.
GENERAL FEATURES
• 26 voices, 4 part multimbral.
• 3 part effects section (FX, delay and reverb) for each part
• 49-key velocity sensitive keyboard (keyboard version only) with octave shift buttons, +/-2 octaves.
• Keyboard Split with 2 slots for the upper and lower sections.
• Modulation Wheel (keyboard version only).
• Pitch Stick with no dead zone at zero crossing (keyboard version only).
• Programmable Pitch bend range, up to +/- 4 octaves
• Separate up/down bend range: -12 or -24 semitones, + 2 semitones
• 1 pedal input for sustain.
• 1 pedal input for expression pedal.

USER INTERFACE
• 3 LED displays, 23 knobs, 3 encoders and 20+ buttons for program and performance editing.

OSCILLATOR SECTION
• Oscillator models of multiple waveforms (traditional analog, extended analog, pulse waveforms, real-time algorithmic waveforms with additive, FM- and formant- synthesis)
• OSC config knob 11 categories (Pitch, Shape, Osc Sync, Noise Mix, Osc 2 Detune, Sine Mix, Tri Mix, Saw Mix, Square Mix, Freq Modulation, Amp Modulation)

FILTER SECTION
• Multi-mode filter with 12 dB (2-pole) low pass, 24 dB (4-pole) lowpass and band pass, high pass, Ladder M and Ladder TB characteristics.
• Cut off, Resonance, envelope amount, envelope amount controlled by velocity.
• ADR/ASR envelope.
• Filter keyboard tracking can be set to off, 1/3, 2/3 or full.
• Adjustable Filter Distortion.

MODULATION SECTION
• LFO generates a triangle, square, sawtooth, inverted sawtooth or sample and hold waveforms. LFO can be routed to Filter Frequency and Osc mod. The LFO rate can be synchronized to the Master Clock.
• LFO can be switched to polyphonic Env mode with four different characteristics and sample and hold is manually triggered by keyboard (polyphonic S/H).
• Arpeggio: Range: 1 - 4 octaves. Modes: up, down, up/down and random. The Arpeggio rate can be synchronized to the Master Clock.
• ADR/ASR envelope, velocity control on/off, inverse envelope on/off.

AMPLIFIER SECTION
• ADR/ASR envelope, velocity control on/off, gain control.
• Individual Pan-control per program

PERFORMANCE SECTION
• Voice modes: Poly, Legato and Mono with portamento, True Unison 1, 2 & 3.
• Four program slots for layering possibilities and multimbralility.

EFFECTS
• FX section with Flanger, Phaser, Ring Modulation, Chorus, Ensemble and Drive.
• Delay section with tap tempo, four stages of feedback, stereo ping-pong, dry/wet mix. The Delay speed can be synchronized to the Master Clock.
• Reverb section with five algorithms (Room, Stage 1, Stage 2, Hall 1, Hall 2).

MEMORY
• Programs (single sounds): 8 x 50 (400) locations
• Performances (multi sounds): 4 x 50 (200) locations

AUDIO OUT
• 4 outputs. Each slot can be assigned to its own output.
• Headphones output.
• High resolution low noise 24 bit DACs.

MIDI FEATURES
• All control knobs and switches send control change messages.
• System exclusive bulk dumps. One program or all programs.
• Master Clock will sync to incoming MIDI clock.
• Soft Thru

CONNECTION
• 4 Line Level Audio Outputs - ¼", 6.35 mm jacks, unbalanced
• Stereo Headphone Output - ¼", 6.35 mm stereo jack
• Sustain Pedal - ¼", 6.35 mm jack. Use a momentary pedal, like e.g., Roland DP-2, DP-6, Yamaha FC-4, FC-5, Fatar VFP1-25 etc.
• Control Pedal - ¼", 6.35 mm TRS stereo jack. Use a Yamaha FC-7, Roland EV-7, Roland EV-5, Korg EXP2 or Korg XVP10.
• USB connector with MIDI capabilities
• MIDI In & Out - 5 pin DIN connectors

INCLUDED ACCESSORIES
• User Manual
• Power Cord with IEC C14 connector
• Rack Ears (rack version only)

DIMENSIONS
• Nord Lead A1: 802 x 92 x 260 mm (31.5 x 3.6 x 10.2”)
• Nord Lead A1R: 466 x 115 x 169 mm (18.3 x 4.5 x 6.6”)

WEIGHT
• Nord Lead A1: 4.85 kg (10.7 lbs)
• Nord Lead A1R: 3 kg (6.6 lbs)

Specifications subject to change without notice.
NORD LEAD 4
A GROUND-breaking CLASSiC, REBORN.

When the first Nord Lead was released in 1995 it started the Virtual Analog revolution, offering a very distinctive sound combined with the tweakability otherwise reserved for vintage analog synthesizers.

The new Nord Lead 4 takes what made the Nord Lead a success and adds a whole bunch of innovative new features justifying the name - performance synthesizer.

SOUND DEMOS

Listen to sound demos of the Nord Lead 4: nordkeyboards.com/nordlead4
OSCILLATOR SECTION

The Nord Lead 4 is a subtractive synthesizer with 2 oscillators per voice. All the classic waveforms are present, Saw, Square, Sine, Triangle, Pulse and PWM.

The Nord Lead 4 also features Frequency (FM) controls for adding spectral complexity and occasionally, nastiness.

TRUE UNISON

The true Voice Unison mode lets you stack up to four voices on top of each other per note (including the complete signal path of the Nord Lead 4) for really thick, wide leads and basses.

HARD & SOFT SYNC

Hard Sync generates an irregularly shaped waveform resulting in a harsh, dirty effect rich with harmonics, first made famous by the Prophet 5. Soft Sync is a bit smoother, but by no means subtle.

WAVETABLE SYNTHESIS

The Nord Lead 4’s Oscillator 1 section features a wide selection of wavetables including a unique type called Formant Wavetables with resonant qualities that are independent of pitch. Frequency Modulating the Formant Wavetables can produce some truly magic results with distinctive acoustic qualities.
MODULATION

LOW FREQUENCY OSCILLATION
Nord Lead 4 features two very flexible LFO-sections per slot. A wide selection of LFO-shapes is available from sines and pulses to ramping saws perfect for creating wobbling basses or pulsing pads. Each LFO can easily be synchronized to the Master Clock and assigned a desired time division. The LFO can be re-triggered manually with an Impulse Morph button or a key. The LFO destinations include the option to modulate the FX section.

MODULATION ENVELOPE
Nord Lead 4 offers a very capable Modulation Envelope section with an expanded choice of modulation destinations. The Modulation Envelope can also be triggered manually with an Impulse Morph button!

FILTER
The filter section of the Nord Lead 4 features 12/24 and 48 dB Low Pass filters plus a High Pass filter with dedicated ADSR filter envelope and selectable filter tracking.

LADDER FILTER EMULATION
The filter section also features two stunning emulations of the transistor ladder filters from a certain legendary Mini and the 303. The emulations capture the dirty, squeaky resonance of the originals and combined with the new unison mode you’ll have plenty of opportunities for making fat, squelchy basses and leads.

DRIVE
A new overdrive that operates separately per voice can distort the waveform before it passes through the effects sections.

MUTATOR
The Nord Lead 4 Mutator feature is an automatic program generator with adjustable style and strength that can either warp an existing program or create new totally randomized programs.
PERFORMANCE

IMPULSE MORPHS

The Impulse Morph buttons are extremely powerful and let you alter your sound instantaneously – brilliant for creating spontaneous, synchronized rhythmic and tonal mayhem. Doubling the LFO rate, changing the oscillator from Saw to Square, enabling Glide, cranking up the resonance and muting the Reverb - all at once - for 2 seconds in the middle of your lead solo is now as easy as 1-2-3. Doing wobbly bass lines and complex choppy pads live, in perfect sync is a breeze! Impulse Morphs is a simple, yet universal concept that offers almost limitless flexibility.

Assigning a Impulse Morph is simple – just hold down an Impulse Morph button and turn the desired knob(s) to the new value! Nearly every parameter can be controlled with an Impulse Morph and LED-lights indicate which parameters have been altered. By pressing different combinations of the 3 Impulse Morph buttons up to 7 Impulse Morphs are available.

MORPHS

The Morph is a classic Nord feature that lets you control any “knob-type” parameters with the modulation wheel, control pedal or velocity. The possibilities are endless – like changing arpeggiator range or adjusting the Sample rate reduction with the modulation wheel.

LAYERING

Having 4 identical, equally powerful synthesizers at once at your disposal opens breathtaking layering possibilities, both rhythmically and sonically. The Split-mode gives you two 2 slots on each side of the split. A flexible Hold functionality lets you latch and hold slots independently in the background while playing something else on top.

PITCH STICK

The unique Pitch Stick can be used for bending notes as well as creating subtle vibrato effects, much like a guitarist or violinist as there is no dead zone in the middle position. The bend range can range from zero to 48 notes up/down and can be unique to each program.

CHORD MEMORY

The handy Chord Memory function memorizes combination of notes so you can play a fifth or a chord with one finger, brilliant for leads and quirky themes.

ARPEGGIATOR

The Nord Lead 4 includes a classic Arpeggiator with Up/Down and Random modes and a 4-octave range. The Arpeggiator can be synced to the LFO and Delay using the Master Clock. A new Poly mode pulses all the notes you’re holding as a chord instead of cycling through the individual notes, great for choppy chord stabs when combined with the new Patterns and Impulse Morph buttons. The Arpeggiator can be re-triggered both by the keyboard and using the Impulse Morph buttons, and with 4 slots you can have 4 arpeggios running at once!

PATTERNS

The new Patterns feature contains a selection of simple rhythmic figures that can be assigned to the Arpeggiator or control the LFO.

MASTER CLOCK

At the heart of the Nord Lead 4 is the Master Clock controlling the global tempo. The LFO, Arpeggiator and Delay can be all be synchronized to the Master Clock. The tempo is easily changed globally with a Tap-tempo button so you can tap in to the beat of your drummer and play intricate rhythmically interlocked parts in perfect sync. The Master Clock can also be slaved to an external MIDI clock.

The control pedal support has been extended and now includes Yamaha FC7, Roland EV-7, Roland EV-5, Korg EXP2 and Korg XVP10.
**SOFT CASE**
Keep your Nord instrument in perfect shape with the ultimate soft case, featuring a plush interior, thick padding, and the distinctive Nord red color. The mid-sized pocket will hold all your cables and accessories. Carrying handles, shoulder strap, and two backpack straps let you carry your instrument any way you want.

**SUSTAIN PEDAL**
Sustain pedal.

**DUST COVER**
Cover and protect your Nord unit with the matching Dust Cover.

---

**EFFECTS**
Each of the 4 slots has its own dedicated effects section: FX and Delay/Reverb.

**DRIVE**
An overdrive effect modelled after a vintage tube amp is available. Make your lead sound a little "furry" or crank it up for a truly authentic overdrive that distorts increasingly the more signal you shove through it.

**CRUSH**
The Crush effect lets you reduce the sound’s sample rate radically. Give your bass line a subtle lo-fi touch or pulverize it into crackling, digital star dust.

**TALK**
The Talk effect creates a voice-like talk box effect, with two different simulations of a vocal tract.

**COMB FILTER**
The Comb filter effect can create chorus-like effects when controlled from an LFO or static spectral changes in your sound.

**COMPRESSOR**
The compressor effect offers Threshold adjustment and can also be modulated to obtain side-chain effects and more.

The Crush, Talk, Comb filter, Compressor and Drive effects can all be manipulated with the Morphs and Impulse Morph performance controls as well as with the LFO or the Modulation Envelope.

**REVERB & DELAY**
The Delay effect has 3 feedback levels, a Dry/Wet control and can be synchronized to the Master Clock. The Delay has an optional analog mode that behaves like an old school delay when changing the delay rate on the fly...

A great sounding reverb effect is available when not using the Delay, with dry/wet controls, 3 reverb types and a brightness control for rolling off the treble when desired.

**USB-MIDI**
With USB-MIDI, 29+ rotary knobs and 20+ buttons that all send CC-data, the Nord Lead 4 can also serve as a brilliant master keyboard for controlling soft synths.

**KEYBED**
The 49 velocity sensitive synth keys are very responsive and great for quick leads, basses and percussive sounds.
TECHNICAL SPECIFICATIONS

POLYPHONY
- 20 voices. 4 part multi-timbral.

SPECIAL FEATURES
- Morph: One or more continuous (knob-type) parameters can be controlled by keyboard velocity and/or the Modulation Wheel/Control Pedal.
- Impulse Morphs: Both continuous (knob-type) and button-type parameters can have alternate value settings activated by Impulse Morph buttons. 7 unique Impulse Morphi possible by pressing a combination of the 3 buttons.
- Master Clock: The LFO rates, Arpeggio rate and Delay time can be synchronized to an internal or external (via MIDI) clock, with selectable rhythmic divisions.
- Mutator: Automatic program generator with adjustable style and strength.

PERFORMANCE CONTROLLERS
- 4 octave velocity sensitive keyboard with octave shift buttons (+/-2 octaves).
- 3 momentary Impulse Morph Buttons, 7 Impulse Morphs.
- Keyboard Split with 2 slots each for the upper and lower sections.
- Modulation Wheel.
- Pitch Stick (with no dead zone at zero crossing).
- Flexible Pitch bend range, up to +/- 4 octaves.
- 1 pedal input for sustain.
- 1 pedal input for expression pedal.

USER INTERFACE
- 3 digit display, 29 knobs and 20+ buttons for program and performance editing.

OSCILLATOR SECTION
- OSC 1 generating sine, triangle, sawtooth, fixed and modulateable pulse waveforms and wavetables.
- OSC 2 generating triangle, sawtooth or fixed and modulateable pulse waveforms or noise.
- OSC Mod section with Hard- and Soft sync plus Frequency Modulation of OSC 1 from OSC 2.

FILTER SECTION
- Multi-mode filter with 12 dB (2-pole) low pass, 24 dB (4-pole) and 48 dB (6 pole) low pass, band pass, high pass, Ladder M and Ladder 303 characteristics. Cut off, Resonance, envelope amount, envelope amount controlled by velocity. ADSR envelope. Filter keyboard tracking can be set to off, 1/3, 2/3 or full. Adjustable Filter Distortion.

AMPLIFIER SECTION
- ADSR envelope, velocity control on/off, gain control.

MODULATION SECTION
- LFO 1 generates a square, triangle or any of 4 different types of saw- and inverted sawtooth waveforms. LFO 1 can be routed to Filter Frequency, Osc Mod, Osc Mix, Osc 1 and/or Osc 2 Pitch, Amplitude and FX section. The modulation amount can be set as positive or negative/inverted. The LFO 2 rate can be synchronized to the Master Clock.
- LFO 2 filters the cyclic waveforms of the LFOs can be replaced by a pattern behavior. There are 128 different patterns, grouped in 6 different styles.

PERFORMANCE SECTION
- Voice modes: Poly, Legato with portamento, Mono, True Unison 1, 2 & 3.
- Four program slots for layering possibilities.

EFFECTS
- FX section with continuous Drive/Modulation control, Crush, Drive, 2 different Talk effects, Compressor and Comb Filter.
- Selectable Delay or Reverb. Delay times at up to 1400 ms can be manually set or synchronized to the Master Clock. Reverb has three algorithms, Room, Stage and Hall with adjustable brightness.

MEMORY
- Programs (single sounds): 4 x 99 locations.
- Performances (multi sounds): 99 locations.

AUDIO OUT
- 4 outputs. Each slot has its own output.
- Headphones output.
- High resolution low noise 24 bit DACs.

MIDI FEATURES
- All control knobs and switches send and receive control change messages.
- System exclusive bulk dumps. One program or all programs.
- Master Clock will sync to incoming MIDI clock.

CONNECTIONS
- 4 Line Level Audio Outputs - ¼", 6,35 mm jacks, unbalanced.
- Stereo Headphone Output - ¼", 6,35 mm stereo jack.
- Sustain Pedal - ¼", 6,35 mm jack. Use a momentary pedal, like e.g., Roland DP-2, DP-6, Yamaha FC-4, FC-5, Fatar VFP1-25 etc.
- Control Pedal - ¼", 6,35 mm TRS stereo jack. Use a Yamaha FC-7, Roland EV-7, Roland EV-5, Korg EXP2 or Korg XV10.
- USB connector with MIDI capabilities.
- MIDI In & Out - 5 pin DIN connectors.

INCLUDED ACCESSORIES
- Power Cord with IEC C14 connector.
- Nord CD/DVD-ROM with Nord Sound Manager.
- Rack Ears (Nord Lead 4R only).

DIMENSIONS
- Nord Lead 4: 864 x 94 x 273 mm (34.0 x 3.7 x 10.7")
- Nord Lead 4R: 466 x 115 x 169 mm (18.3 x 4.5 x 6.6")

WEIGHT
- Nord Lead 4: 5.4 kg (11.7 lbs)
- Nord Lead 4R: 3.35 kg (6.6 lbs)

Specifications subject to change without notice.
THE SYNTHETIC DREAM DRUM

Nord Drum 2 combines the playability of real percussion with unique and powerful sound creation possibilities! Create and play anything from classic analog drum machine sounds and 80’s disco toms to mindblowingly realistic percussion sounds you’ve never heard before.

SOUND DEMOS
Listen to sound demos of the Nord Drum 2: nordkeyboards.com/norddrum2

Nord Pad available as optional accessory.
The Nord Drum 2 is a unique instrument designed with the performing musician in mind. Its extreme dynamic range and super-fast triggering add to the feeling of playing a real percussive instrument.

The sounds of the Nord Drum 2 are generated in real time by three sound generating sections – Tone, Noise and Click. A simple analogy is to compare these to the components of an acoustic snare drum sound:

- **Tone** can be compared to the drum heads.
- **Noise** can be compared to the snares that create the "rattle" in a snare drum.
- **Click** is the very first part of the sound (attack) – determined by what material you hit the drum head with, like a drum stick, mallet or similar.

### TONE

The Nord Drum 2 tone section offers 3 different synthesis modes, each with their own special tricks.

- The Resonance Modeling mode simulates the resonances characteristic for drum heads, bars, tines and cymbals. It can deliver very realistic acoustic-sounding results.
- The Subtractive Synthesis mode is excellent for creating classic drum machine sounds using Sine, Saw, Triangle, Square and Pulse waveforms and a dynamic Low-Pass filter.
- The Frequency Modulation mode is brilliant for creating synthetic fantasy percussion.

### NOISE

The Noise-section lets you add texture to your sound. It features 3 filter types, Low Pass, High Pass, and Band Pass with adjustable resonance, cut-off and powerful Dynamic Filter control. The Noise Decay can be Gated, faded and be controlled dynamically.

### CLICK

The Click-section is a specialized section for an ultra-short attack to the sound. A wide range of different click type are available as well as a level control for finding the sweet spot where the Click merges with the other elements and becomes one coherent sound.
DYNAMIC CONTROL
Nord Drum 2 offers extensive control of the dynamic response. The Bend parameter can make the pitch travel up (or down) depending on how hard you play. The Decay of both the Noise and Tone section can be controlled dynamically, including the option to shorten the decay the harder you play for a dampening-like effect.

EFFECTS & MIXER
The Channel Mixer sets the level for each channel and also features a Pan control for creating a lush stereo image. If you like to send the kick to a separate output, just pan that channel all the way to the left and the other channels to the right.

The Distort parameter lets you roughen up your sounds with a sample rate reducing Crush effect or a non-linear distortion modeled after the amplifier circuits of a vintage drum synthesizer module. The Repeat effect produces an effect similar to a MIDI Delay. The repeating hits will be generated as if they were played from a pad, including the complex dynamic behavior of the Nord Drum 2 sound engine.

FLEXIBLE INPUTS
The flexibility of having both Trigger and MIDI-inputs lets you use the Nord Drum in numerous ways. The Nord Pad, drum pads, triggers and MIDI can be combined! Put an acoustic drum trigger on your acoustic bass drum, add some electronic drum pads as extra toms and let a MIDI sequencer trigger a hi-hat sound. The Nord Drum 2 can also be used as a 6-channel Trigger-to-MIDI interface.

The adjustable input sensitivity and Trig Types lets you tailor the Nord Drum 2’s response to the equipment of your choice.

OPTIONAL ACCESSORIES
NORD PAD
The Nord Pad is a light weight (1.5 kg / 2.2 lbs) playable solution for playing the Nord Drum 2 with six super responsive drum pads and a convenient single cable connector. Universal Module Mount included.

TECHNICAL SPECIFICATIONS

SOUND GENERATION
- 6-channel Percussion Modeling Synthesizer.
- Tone section - Resonance modeling, Subtractive and FM-synthesis.
- Click section - Several click models with adjustable level.
- Effects - Drive/Crush distortion and EQ-effects per channel plus Repeat effect.

CONNECTIONS
- 2 Audio Outputs ¼", 6,35 mm (unbalanced)
- Stereo Headphones Output - 1/8", 3,5 mm
- MIDI in & out - 5 pin DIN connectors
- 6 generic trigger inputs - ¼", 6,35 mm
- Nord Pad input - RJ45 connector
- DC input - 12V, 250mA

MIDI
- MIDI Note ON/OFF
- MIDI Channel Learn
- MIDI Note Learn
- MIDI Program Change
- MIDI CC parameter control

INCLUDED ACCESSORIES
- User Manual
- Universal Module Mount
- Universal Power Adapter

DIMENSIONS
- Nord Drum 2: 222 x 43 x 140 mm (8.74 x 1.69 x 5.51”)
- Nord Pad: 295 x 27 x 219 mm (11.61 x 1.06 x 8.62”)

WEIGHT
- Nord Drum 2: 695 g (1.55 lbs)
- Nord Pad: 1.55 kg (2.2 lbs) (Sold separately)

MODERN CLASSIC

Since its first release in 2001, the premium vintage sounds, hands-on interface and robust, portable design has made the Nord Electro series a modern classic and a first choice for gigging musicians all over the planet.

SOUND DEMOS

Listen to sound demos of the Nord Electro 4: nordkeyboards.com/nordelectro4
NORD PIANO LIBRARY

The Nord Electro 4 Piano Section comes loaded with a selection of amazing sounds from the Nord Piano Library - our specialized library for Grand, Upright and Electrical Pianos, Clavinet and Harpsichords.

All the sounds have been recorded using our state-of-the-art sampling techniques to capture the extraordinary nuances and unique characters of the source instruments and covers everything from brilliant, factory new Grand Pianos to detuned upright bar pianos with tons of charm.

Replacing the sounds is simply a matter of dragging and dropping files in the Nord Sound Manager for Mac and Windows.

The Long Release feature is suitable for legato playing styles and the String Resonance (Gen 1) feature on Grand and Upright Pianos can be turned off when desired.

Nord Piano Library is included on DVDs and new additions can be downloaded free from nordkeyboards.com.

NORD SAMPLE LIBRARY

The Nord Sample Library gives you access to our exclusively licensed Mellotron and Chamberlin sounds and a wide selection of quality sounds from leading sample producers. The Nord Sample library is expanding rapidly all new additions are available as free downloads!

NORD SAMPLE EDITOR

With the included software Nord Sample Editor you can even create your own sample instruments. Load your .WAV-files, assign them to keys on the keyboard and transfer them to the Nord Electro 4 to play them instantly. The Nord Sample Editor can also assist you in looping and mapping your sounds.

Read more about the Nord Piano Library in the Sound Libraries section.

Read more about the Nord Sample Library in the Sound Libraries section.

Read more about the Nord Piano Library in the Sound Libraries section.
**ORGAN SECTION**

**TONE WHEEL ORGAN**

The Nord Electro 4 features the B3 tone wheel organ engine from our flagship organ Nord C2D and includes a redesigned Key Click simulation as well as the Rotary Speaker simulation of a vintage 122 unit with a great new overdrive. The percussion model has been improved to offer increased control over the percussion levels when playing near-legato.

The organ can be split, for compact dual manual action and its even possible to assign the lower manual to a second MIDI keyboard.

The Nord Electro 4D is fitted with physical drawbars of the same type as on our flagship organ, the Nord C2D, perfect for actively shaping the sound on the fly. The Nord Electro 4 SW73 / 4 HP organ section is identical in features but sports our Digital LED Drawbars.

**VOX AND FARFISA**

The Farfisa* and Vox* models are just as impressive as the B3, simulating the behavior and unique response of the original instruments. The Farfisa Compact Deluxe, considered by many to be the mother of transistor organs, involves routing matrixes and complex filter combinations that offer a tailored sound with massive energy and high-end.

The Vox* Continental’s brute design brings you a more hollow tone, but with a very intense character. Both these transistor organs have their own unique, irreplaceable personalities. Combine them with any of the Amp simulations, add some distortion, adjust the EQ and they will definitely get you through any organ gig with flying colors.

The Nord Electro 4 SW73 and Nord Electro 4 HP features our Digital LED drawbars while the Nord Electro 4D features physical drawbars.
EFFECTS

The Nord Electro 4 Effect section offers a wide selection of great, tweakable effects for instantly adding some dirt, glimmer or atmosphere to your sound.

Great sounding modulation effects modeled after vintage stompboxes are only one press of a button away, and includes Tremolo, Pan, Chorus, Flanger, Wah-effects and Ring Modulation.

The Nord Electro 4 series also features a number of astonishing speaker simulations that can add some bite or fuzz to your performance. Choose from several classic guitar amps to the Vintage 122 Rotary Speaker simulations with a new Drive from our flagship combo organ, Nord C2D.

LIGHTWEIGHT

Portability has always been a key feature for the Nord Electro. The Nord Electro 4D (7.65 kg/15.3 lbs) and Nord Electro 4 SW73 (9.1 kg/18.2 lbs) can easily be carried on your back with the optional Soft Case accessory. The Nord Electro 4 HP weighs only 11 kg, amazingly light for a Hammer Action keyboard.
PERFORMANCE

Changing, editing and storing presets is a breeze and there are also 4 handy Live memory locations that automatically saves what you're doing. The Program memory can hold 128 different Programs, organized in 32 Pages with 4 Programs each.

All Nord instruments have dedicated knobs and buttons for all vital functions to keep the interface simple and easy to use during a performance. Functions only accessible through menus are printed on the panel for easy overview.

KEYBEDS

HAMMER ACTION PORTABLE (HP)

The Electro 4 HP sports amazingly portable weighted hammer action piano keys. Perfect for electric and acoustic piano sounds, although the High Trigger-point mode even works great for organ playing.

Key range E-E.

SEMI WEIGHTED WATERFALL (SW)

The Nord Electro 4 and Nord Electro 4D features semi weighted organ type keys with a rounded “waterfall” tip, brilliant for rapid organ shredding and synthesizer licks, but also plays nice with piano sounds.

Key range C-C on Electro 4D SW61 and F-F on Electro 4 SW73.

FREE UPGRADES

OS upgrades, pianos and samples can be downloaded free of charge from www.nordkeyboards.com
## OPTIONAL ACCESSORIES

### SOFT CASE
Keep your Nord instrument in perfect shape with the ultimate soft case, featuring a plush interior, thick padding, and the distinctive Nord red color. The mid-sized pocket on the lid will hold all your cables and accessories. Carrying handles, shoulder strap, and two backpack straps allows you to carry your instrument any way you want.

### DUST COVER
Cover and protect your Nord unit with the matching Dust Cover.

### KEYBOARD STAND EX
Nord Electro 4 HP only.

### SUSTAIN PEDAL
Sustain pedal.

For additional specifications, see the Nord Electro 4 specification page.
ORGAN SECTION
• Nord C2D Tone wheel engine
• Three classic organ models: B3, Vox Continental, and Farfisa with full polyphony.
• 9 digitally controlled drawbars (Nord Electro 4 / 4 HP)
• 9 physical drawbars (Nord Electro 4D).
• Two complete organ registrations for every program
• Percussion with 2nd, 3rd, normal/soft, fast/slow for the B3 model.
• User adjustable percussion levels, percussion decays and keyclick level.
• Vibrato / Chorus Control with separate functionality for each model (the classic C1, C2, C3, V1, V2, V3 options for the B3, Vibrato for the Farfisa).
• 4 Tonewheel modes: select the level of "vintage" you wish to have in your B3 sound.
• MIDI Split: The Nord Electro 4 can support an extra MIDI keyboard when the Organ Split mode is activated. This makes it possible to use the Nord Electro 4 as a dual manual (Lower/Upper) organ with different drawbar settings for each manual.

PIANO AND SAMPLE SECTION
• All of the sounds in the Piano and Sample section can be replaced using the Nord Sound Manager (Win/Mac).
• 5 selectable types of pianos - Grand, Upright, EPiano, Wurl & Clav/ Harpsichord. Each type can contain several different models.
• 380 MB allocated to the Piano Library (185 MB for Nord Electro 4D).
• The Sample Library section contains up to 50 samples from the Nord Sample Library.
• 128 MB allocated to the Sample Library (68 MB in the Electro 4D).
• Stereo pianos and samples can be played back in mono.
• String Resonance (Gen1)
• 40-60 Voices polyphony.

EFFECTS SECTION
• Effect 1 - pan, tremolo, auto-wah, pedal-wah and ringmodulator.
• Three selectable depths for the pan and tremolo, rate controlled with the Effect 1 Rate knob.
• Control pedal assigned to pedah-wah and ring modulator depth.
• Effect 2 - phaser, flanger and chorus.
• Three selectable depths, rate controlled with the Effect 2 Rate knob.
• Comp/Amp - three amp/speaker simulations, compressor and rotary speaker.
• Drive/Compression amount controlled with the Drive knob.
• Rotary speed controls - Slow, Fast and Stopped.
• User adjustable rotary treble and bass rotor speeds and acceleration rates.
• Delay Effect – Stereo Ping-Pong with Tap-tempo
• Reverb with five algorithms - Room, Stage Soft, Stage, Hall, Hall Soft.
• Dry/Wet control.
• Three band EQ, with sweepable mid. +/- 15 dB gain/attenuation.

GLOBAL FEATURES
• 128 program memories.
• 4 Live Slots
• Keybeds:

CONNECTIONS
• 2 Audio outputs
• 1 Monitor input
• 1 Headphone output
• 1 control pedal input with support for Yamaha FC7, Roland EV-7, Roland EV-5, Korg EXP2 and Korg XVP10.
• 1 Sustain pedal input
• 1 Rotary Speaker speed switch pedal input
• MIDI In, MIDI Out
• USB interface for transferring sounds, OS updates and USB MIDI communication.

INCLUDED ACCESSORIES
• User Manual
• Power cord
• Nord DVD-ROM

DIMENSIONS
• Nord Electro 4D SW61: 901 x 95 x 292 mm (35.5 x 3.7 x 11.5")
• Nord Electro 4 SW73: 1120 x 100 x 300 mm (44.1 x 3.9 x 11.8")
• Nord Electro 4 HP: 1078 x 121 x 344 mm (42.4 x 4.8 x 13.5")

WEIGHT
• Nord Electro 4D SW61: 7.65 kg (15.3 lbs)
• Nord Electro 4 SW73: 9.1 kg (18.2 lbs)
• Nord Electro 4 HP: 11 kg (24.25 lbs)

Specifications subject to change without notice.
PLAY, SPLIT AND LAYER

The Nord Piano 2 gives you our best acoustic and electric piano sounds as well as access to our versatile Nord Sample Library and great sounding, tweakable effects.

The new Nord Piano 2 HP features the light weight 73-key Hammer Action Portable keybed.

SOUND DEMOS
Listen to sound demos of the Nord Piano 2: nordkeyboards.com/nordpiano2
EXQUISITE PIANOS

NORD PIANO LIBRARY

The Nord Piano 2 comes loaded with a selection of amazing sounds from the Nord Piano Library - our specialized library for Grand, Upright and Electrical Pianos, Clavinet and Harpsichords.

All the sounds have been recorded using our state-of-the-art sampling techniques to capture the extraordinary nuances and unique characters of the source instruments and covers everything from brilliant, factory new Grand Pianos to detuned upright bar pianos with tons of charm.

Replacing the sounds is simply a matter of dragging and dropping files in the Nord Sound Manager for Mac and Windows.

Read more about the Nord Piano Library in the Sound Libraries section.

STRING RESONANCE

Nord Piano 2 features our most advanced implementation of String Resonance, reproducing the intricate interplay of piano strings resonating at their fundamental or harmonic frequencies when other notes are played on our Upright and Grand piano sounds.

PEDAL NOISE

When used with the Nord Triple Pedal, Pedal Noise recreates the mechanical sounds of lifting and releasing the damper mechanism, producing the characteristic thump and sizzle sounds. The Pedal Noise feature responds dynamically to the force/momentum used when pressing or releasing the pedal.

LONG RELEASE

The Long Release feature is suitable for legato playing styles and can be turned off when desired.

HIGHLIGHTS

- 2-part multimbral (Piano/Sample)
- Layer/Split functionality
- Nord Piano Library support
- Nord Sample Library
- Advanced String Resonance (Gen 2)
- Pedal Noise
- Long Release
- Effects section
- USB MIDI
- Two versions – HA88 and HP

The Nord Triple Pedal is included with Nord Piano 2 HA88 and is available as an optional accessory for the Nord Piano 2 HP.
SAMPLE SYNT H
The Sample Synth section lets you play sounds from our extensive Nord Sample Library - containing over 1000 quality sounds from leading sample producers as well as the exclusively licensed sounds of the Mellotron and Chamberlin.

The Sample Synth section has dedicated knobs for adjusting the attack and release and volume of the selected sound.

Read more about the Nord Sample Library in the Sound Libraries section.

NORD SAMPLE EDITOR
With the included software Nord Sample Editor you can even create your own sample instruments. Load your .WAV-files, assign them to keys on the keyboard and transfer them to the Nord Piano 2 to play them instantly. The Nord Sample Editor can also assist you in looping and mapping your sounds.

PLAY, SPLIT & LAYER
Setting up a layer or split has never been easier and the volume of the Sample Synth can be controlled separately with an optional Volume Pedal - great for sneaking in those strings. The Sample Synth section can even be set to either ignore Sustain or use the sostenuto pedal on the Nord Triple Pedal as separate sustain for advanced layering possibilities.

EFFECTS
The Nord Piano 2 has an extensive Effect section with great, tweakable effects. Each effect section can be assigned to either the Piano or the Sample Synth section and lets you instantly add some dirt, glimmer or atmosphere to your sound.

The Effects include classic modulation effects modeled after vintage stomp-boxes, a stereo delay, a 3-band EQ, amp simulations of vintage tube amps, a compressor and a master reverb.

PERFORMANCE
The Nord Piano 2 has dedicated knobs and buttons for all vital functions a player needs in a performance situation. Transposing, setting up a split point or creating a layered sound is accomplished in seconds. There are 240 locations, organized in 2 banks with 24 pages with 5 programs each. The Nord Piano 2 also has 5 Live locations that automatically save the current settings - ideal as a sketching pad at rehearsals when trying out new sound combinations in the search of the perfect sound.

LIGHTWEIGHT
The Nord Piano 2 HA88 is the most light weight (18 kg/40 lbs) professional 88-key stage piano on the market. For those wanting an even more light weight option we now also offer the new Nord Piano 2 HP with an exquisite 73-key Hammer Action Portable key bed, weighing in at only 11 kg/ 24.25 lbs!
FREE UPGRADES

OS upgrades, pianos and samples can be downloaded free of charge from www.nordkeyboards.com

KEYBEDS

HAMMER ACTION (HA)
The Nord Piano 2 HA88 features 88 fully weighted hammer action keys. Key range A-C (HA88).

HAMMER ACTION PORTABLE (HP)
The Nord Piano 2 HP sports 73 amazingly portable weighted hammer action piano keys. Key range E-E (HP).
TECHNICAL SPECIFICATIONS

GLOBAL
- LCD Display
- 2 banks with 24 pages each, 5 programs - 240 locations
- Live Mode – 5 Live programs
- Global Transpose: +/- 6 semi tones
- Program Transpose: +/- 6 semi tones

PIANO SECTION
- 500 MB memory for Nord Piano Library sounds
- 40/60 Voices Polyphony (stereo/mono pianos)
- 6 categories – Grand, Upright, Electric Piano 1, Electric Piano 2, Clavinet and Harpsichord. Each category can contain up to 9 models.
- Advanced String Resonance, Generation 2
- Kbd Touch: 4 velocity response curves
- Long Release
- Mono Output – stereo pianos can be played back in mono

SAMPLE SYNTH
- 128 MB memory for Nord Sample Library sounds
- Up to 99 sample instruments
- 16 Voices Polyphony
- Attack and Release controls
- Octave Transpose: -1/+3
- Sustain pedal can be set as sustain or gate pedal for the Sample Synth section.
- Volume controllable with Volume Pedal (not included)

EFFECTS SECTION
- Effect 1 - Pan, Tremolo, Stereo Auto-wah. Three selectable depths for the pan and tremolo, rate controlled with the Effect 1 Rate knob
- Effect 2 - Stereo Phaser, Flanger and Chorus. Three selectable depths, rate controlled with the Effect 2 Rate knob
- Delay - Four levels of feedback amount, Dry/Wet adjustment. Tempo can be set manually or with Tap Tempo button. Range: 20 ms - 750 ms
- Three band EQ, with sweepable mid. +/- 15 dB gain/attenuation
- Comp/Amp - Twin, JC, Small (mono), Tube distortion (stereo) and compressor (stereo).
- Reverb with six algorithms – Room 1&2, Stage 1&2, Hall1&2, Dry/Wet control
- Each effect assignable to either Piano or Sample Synth section

CONNECTIONS
- 2 Audio outputs L & R - ¼", 6.35 mm jacks, unbalanced
- 1 Monitor input - 1/8", 3.5 mm stereo jack
- 1 Headphone output - ¼", 6.35 mm stereo jack
- 1 Piano pedal input - ¼", 6.35 mm jack. Use the included Nord Triple Pedal or a momentary pedal, like e.g. Roland DP-2, DP-6, Yamaha FC-4, FC-5, Fatar YFP1-25 etc
- 1 Volume Pedal input - ¼", 6.35 mm TRS stereo jack. Use a Control/Expression pedal like e.g. Yamaha FC-7, Roland EV-5 etc.
- MIDI In, MIDI Out - 5 pin DIN connectors
- USB - type B connector - for transferring sounds and USB-MIDI
- IEC C14 power connector

INCLUDED ACCESSORIES
- Nord Triple Pedal (HAB88 only)
- Nord Single Pedal (HP only)
- User Manual
- Power Cord
- USB Cord
- Nord DVD-ROM

DIMENSIONS
- HAB88: 1284 x 121 x 340 mm (50.5 x 4.8 x 13.4")
- HP: 1054 x 121 x 344 mm (41.5 x 4.8 x 13.5")
- Nord Triple Pedal: 264 x 224 x 70 mm (10.4 x 8.8 x 2.8")

WEIGHT
- HAB88: 18 kg (39.6 lbs)
- HP: 11 kg (24.25 lbs)
- Nord Triple Pedal: 2 kg (4.4 lbs)

Specifications subject to change without notice.
THE ULTIMATE PERFORMANCE KEYBOARD

Introducing our new flagship, the Nord Stage 2 with Nord Piano and Sample Library-compatibility, the organ engine from C2, MIDI over USB and more memory for your favorite sounds. All with a stunningly user-friendly interface where all vital functions are only one button away!

SOUND DEMOS
Listen to sound demos of the Nord Stage 2:
nordkeyboards.com/nordstage2
Over ten years have passed since we made our first digital model of a tone wheel organ. The Stage 2’s dedicated organ section now uses our third generation B3 Organ model, the same as found in our acclaimed Nord C2 Organ.

Considered by many to be the most accurate emulation of the B3 ever, the Stage 2’s organ model is based on the analysis of the signals from each of the 91 spinning discs inside several original instruments and painstaking work on understanding exactly how all the components interact with each other. The virtual circuitry reacts not only to the settings on the panel but also during the real time performance. The Stage 2 will faithfully reproduce the important foldback and energy robbing characteristics; the latter will produce the gentle compression effect that makes those lovely smears absolutely wonderful. There are 3 tone wheel modes that allow you to switch from a clean, factory spec’d instrument to a worn and battered workhorse with many years of touring.

We also created carefully modeled emulations of two of the most famous transistor organs from the 1960’s, the Vox Continental and the Farfisa Compact. Alongside the organs themselves, the Stage 2 features our very latest rotary speaker simulation derived from the C2. Incorporating the acoustic variations that occur as a physical rotating speaker spreads the sound around in a room, they bring the Stage 2’s organs to life with remarkable realism. In terms of control, “Draw buttons” and LED bar graphs have replaced the original mechanical drawbars. This gives you the advantage of always having the correct drawbar settings after changing preset. For Organ sounds only, the Stage 2’s key bed is programmed to respond at its highest trigger position, resulting in authentic feel and allowing lightning fast organ techniques.

The entire Nord Piano Library and Nord Sample Library is included on DVDs and new additions can be downloaded free from nordkeyboards.com.
PIANO SECTION

The Stage 2 Piano section has evolved from the multi award winning Nord Piano; featuring our state-of-the-art sampling techniques the Stage 2’s pianos capture the extraordinary nuances and real character of the individual source instruments. Combined with our latest generation of String Resonance and compatibility with the optional Nord Triple Pedal that adds Dynamic Pedal Noise, the result is breathtaking realism and an unsurpassed expressiveness.

An all-new feature in the Nord Stage 2 is the selectable Long Release – when enabled you will get a slightly longer release more suitable for legato playing.

In addition to vivid acoustic Grand and Upright pianos, the Piano section also features some of the finest, most desirable vintage electric pianos. The Stage 2’s piano sounds are future-proof thanks to its compatibility with the Nord Piano Library. This free online library is continuously updated with both upgraded existing pianos and all-new pianos to keep your instrument constantly renewed.

SYNTH SECTION

The Stage 2’s powerful new synthesizer engine was built from the DNA of the Nord Wave. Capable of classic subtractive synthesis, three operator FM synthesis, Wavetable synthesis and, crucially, compatibility with the Nord Sample Library. The Nord Sample Library not only gives Stage 2 owners access to over 1000 world-class sounds – the included Nord Sample Editor even allows for user-created samples to be loaded into the instrument.

The Synth section also features a dedicated Hold-button and a versatile new arpeggiator with a wide variety of ranges and directions. The arpeggiator can be synced to the Stage 2’s Master Clock for perfect timing with other elements of the Stage 2, including its effects.

The Synth engine itself offers classic subtractive synthesis with dual saw, hard sync and pulse wave modulation, three-operator FM synthesis with 32 different modulation frequencies, Wavetable synthesis with 62 waveforms and Sample based synthesis. A new great-sounding multimode filter features 12 and 24dB low pass, high pass, band pass and notch filters. And with an Amp envelope, Modulation envelope, an LFO, and Unison control, the Stage 2’s synth capabilities are hugely powerful, delivering amazing on-stage sound.
**EXTERN SECTION**

The Nord Stage 2 wouldn’t be a master keyboard if it couldn’t control external devices with ease. The Extern Section lets you seamlessly integrate external MIDI-gear with the Stage 2’s built-in instruments. Zones, splits and layers are handled exactly as if the external equipment was a part of the Stage 2 itself. The Extern settings are saved together with Programs so advanced setups can be immediately recalled during a performance. You can even use the Extern Section to automatically transmit Bank Select and Program Change messages to your external units.

**EFFECT SECTION**

The Stage 2 incorporates all the effects required to cover a musician’s needs. All of the three instrument sections - Organ, Piano and Synth - can be routed individually through the Stage 2’s built-in effect units. Turning the effects on and off, and controlling the routing is easily done by a touch of dedicated buttons, readily accessible at the bottom of each effects unit.

**EFFECT 1**

Choose from Tremolo, two Wahs, an Auto-Wah, and an AutoPan. Use the AutoWah with a Clavinet for raw funk licks, create a psychedelic vibe with an Electric Piano on AutoPan, or give a Wurlitzer some body using the Tremolo. There’s even a Ring Modulator on board, an effect used by many experimental and electronic musicians.

**EFFECT 2**

The two Phasers, two Choruses, the Flanger and new Vibe effect are all modeled after the classic analog stomp boxes that has defined the sound of popular music. These swirling Phasers, metallic Flangers, and thick Choruses are crystal clear and faithfully simulated on the Nord Stage 2.

**DELAY**

A delay unit has been included to create haunting echoes or slap back effects. The delay also supports a ping-pong mode, and the tempo can easily be adjusted with the tap-tempo button, or synced to the master clock. The delay even has an Analog mode for creating classic “warped” sounds when changing the delay rate on repeats.

**AMP SIMULATION & EQUALIZER**

This effect section combines a three-band equalizer with a sophisticated amplifier and speaker cabinet modeler. Classic amplifiers and speakers are a crucial part to make vintage Electric piano sounds come alive. Nord offers the famous sounds of speaker simulations of a Twin Reverb, a Jazz Chorus 120 and a Wurlitzer speaker. When no Amp Model is selected, the unit provides a neutral three-band EQ with sweepable mid and a crunchy overdrive.

**ROTARY SPEAKER**

The new improved Rotary Speaker simulation adds an essential character to organ sounds and also be used with the piano and synth section.

**MASTER EFFECTS**

A Compressor and a Reverb are placed at the end of the sound chain, to help you blend your sounds more naturally together. The Reverb unit has six different Hall, Stage and Room spaces to create different atmospheres for your sounds, while the Compressor helps you keep the overall mix tight and under control.
KEYBEDS

HAMMER ACTION (HA)
The Stage 2 HA88 and HA76 features fully weighted hammer action keys. Brilliant for electric and acoustic piano sounds, although the High Trigger-point mode even works great for organ playing.

Key range A-C (HA88) and E-G (HA76).

SEMI WEIGHTED WATERFALL (SW)
The Nord Stage 2 SW73 features semi weighted organ type keys with a rounded “waterfall” tip, brilliant for rapid organ shredding and synthesizer licks, but also plays nice with piano sounds.

Key range F-F (SW73).

OPTIONAL ACCESSORIES

KEYBOARD STAND EX
The Nord Stage 2 HA88/76 can be fitted with legs reminiscent of a classic electric piano. They are very easy to assemble and disassemble for transport. The stand has two selectable heights.

SOFT CASE
A semi-hard, padded, custom sized soft case is available for safe and comfortable transportation. The soft case for the Stage 2 HA76 and HA88 models also features wheels.

MUSIC STAND EX
An easily attachable music stand is also available for the HA88/76 models.

SUSTAIN PEDAL
Sustain pedal. Included with Stage 2 HA88/HA76.

NORD TRIPLE PEDAL
The Nord Triple Pedal features a unique dynamic Sustain pedal enabling the Pedal Noise-feature, a sostenuto pedal for sustaining selected notes and a Soft Pedal.

DUST COVER
Cover and protect your Nord unit with the matching Dust Cover. Included with Stage 2 HA88/HA76.

GENERAL
- Master Level Control
- Wooden Pitch Stick
- Modulation Wheel
- 400 Programs - 4 Banks with 20 Pages each. Each Page has 5 Program locations
- Program Categories
- Program Sort Modes - numerical, alphabetical or by category
- 5 Live Buffers
- 2 Individual Slot Setups
- 3 Morph sources (Modulation Wheel, Control Pedal, Aftertouch)
- Global Mono output
- Programmable Transpose +/- 6 semitones
- Master Clock functionality with manual, external and tap-tempo rate control
- Internal and MIDI clock source
- Built-in USB MIDI-interface

ORGAN SECTION
- B3 Tone wheel Organ, Vox Continental and Farfisa models with full polyphony
- 9 digitally controlled Drawbars
- Percussion controls
- Vibrato / Chorus control
- Two Drawbar settings per program
- 2-Part Multi-timbral (2 manuals)

PIANO SECTION
- Approx. 500 Megabyte memory for Piano sounds
- Acoustic Grand Pianos
- Upright Pianos
- Electric Pianos
- Wurlitzer A200 Electric Piano
- Clavinet D6
- Harpsichords
- Electric Grand Pianos incl. CP-80
- 40-60 Voices Polyphony
- 4 Selectable Velocity Curves
- Clavinet EQ controls
- String Resonance, Generation 2 (on Acoustic Grand Pianos and Uprights)
- Selectable Piano Release
- Pedal Noise when used with Nord Triple Pedal (optional accessory) on selected acoustic and electric pianos
- Slot Detune functionality
- 2-Part Multi-timbral

SYNTH SECTION
- Sample Playback synthesis: approx. 380 Megabytes of sample memory, up to 999 Sample Instruments.
- Analog synthesis: Multiple waveforms - including Dual Saw, Hard Sync and PWM
- FM synthesis: 2 & 9 Operator FM synthesis
- Waveables synthesis: 62 waveforms
- 18 Voices polyphony
- Unison control - with no reduction in polyphony
- Amplitude envelope
- Modulation envelope
- 12 & 24 dB Low Pass, High Pass, Band Pass and Notch Filter with Resonance
- LFO with 4 waveforms (square, triangle, ramp and sample & hold)
- 300 Patch memory locations
- Arpeggiator (Up, Down, Up-Down and Random). Range: 1, 2, 3 or 4 octaves.
- LFO and Arpeggiator synchronizable to Master Clock
- 2-Part Multi-timbral

GLOBAL PARAMETERS
- Level control
- Zone (split assignment) control

EFFECTS
- Effect 1: Ring Modulator, Tremolo, Pan, Wah 1, Wah 2, AutoWah
- Effect 2: Flanger, Vibe, 2 Phasers, 2 Choruses
- Delay - with Ping Pong (stereo taps) and Tap-Tempo
- 3 types of Speaker simulations, JC, Twin and Small
- Tube amp simulation with adjustable overdrive
- 3-band Equalizer with sweepable mid. EQ ranges:
  - 100 Hz, 200 Hz - 8 kHz and 4 kHz
- Rotary Speaker: selectable speed (Slop, Slow and Fast) and separate overdrive
- Effect rates/tempo can be synchronized to the Master Clock

MASTER EFFECTS
- Compressor
- Reverb - 6 algorithms

KEYBOARD
- HA88/HA76-models: Hammer Action Weighted keyboards.
- Range: HA88: A-C, HA76: E-G
- SW73-model: 73-note Semi Weighted Waterfall keyboard, Range: F-F
- Aftertouch
- Supports 3 split zones with visual LED indication

CONNECTIONS
- 4 Assignable Audio Outputs - ¼", 6.35 mm jacks, unbalanced
- Stereo Headphone output - ¼", 6.35 mm stereo jack
- 1 Monitor input - 1/8", 3.5 mm stereo jack
- Sustain Pedal - ¼", 6.35 mm jack, Use a momentary pedal, like e.g. Roland DP-2, DP-6, Yamaha FC4, FC5, Fatar VP1-25 etc.
- Sustain input compatible with Nord Triple Pedal (sold separately)
- Rotor Pedal - ¼", 6.35 mm jack, Use a momentary pedal or a switch type pedal
- Organ Swell Pedal - ¼", 6.35 mm TRS stereo jack. Use a Control/Expression pedal like e.g. Yamaha FC7, Roland EV-7, Roland EV-5, Korg EXP2 or Korg XVP10.
- Control Pedal - ¼", 6.35 mm TRS stereo jack. Use a Control/Expression pedal like e.g. Yamaha FC7, Roland EV-7, Roland EV-5, Korg EXP2 or Korg XVP10.
- MIDI In - 5 pin DIN connectors
- MIDI Out - 5 pin DIN connectors
- USB - type B connector
- IEC320 C7 power connector

INCLUDED ACCESSORIES
- User Manual
- Dust cover (HA88 and HA76 only)
- Sustain pedal (HA88 and HA76 only)
- Power cord
- Nord Sample and Piano DVDs
- USB cord

DIMENSIONS
- Nord Stage 2 HA88: 1287 x 118 x 334/345 mm (excl./incl. bumpers) (50.7 x 4.7 x 13.2/13.6")
- Nord Stage 2 HA76: 1121 x 118 x 334/345 mm (excl./incl. bumpers) (44.2 x 4.7 x 13.2/13.6")
- Nord Stage 2 SW73: 1105 x 106 x 302 mm (43.5 x 4.2 x 11.9")

WEIGHT
- Nord Stage 2 HA88: 18.5 kg (41 lbs)
- Nord Stage 2 HA76: 16.9 kg (36 lbs)
- Nord Stage 2 SW73: 9.7 kg (21 lbs)

Specifications subject to change without notice.

THE COMPLETE ORGAN SOLUTION

With 2 sets of physical drawbars per manual, extremely realistic simulations of a B3 tone wheel organ, Vox and Farfisa transistor organs and a beautiful sampled baroque pipe organ the new Nord C2D is the ultimate portable organ solution.

SOUND DEMOS

Listen to sound demos of the Nord C2D: nordkeyboards.com/nordc2d
TONE WHEEL ORGAN

The Nord C2D B3 simulation is the result of over a decade of perfecting our tone wheel simulations, a journey that started with the original Nord Electro, followed by the award winning Nord C1 and Nord C2 Combo Organs. Not only did we analyzed the signals from each of the 91 spinning tone wheels inside several original instruments, we have also paid years of attention to each and every one of the intricate details that make up the characteristics of the actual sound in a vintage organ.

Our simulation not only reacts to the panel settings but also adapts to the real time performance and will faithfully reproduce the important fold back and energy robbing characteristics; the latter produces the gentle compression effect that makes those lovely smears absolutely wonderful. There are 4 tone wheel modes available, ranging from the default vintage battered workhorse with plenty of leakage to a clean factory spec’d instrument.

CLICK, PERCUSSION AND VIBRATO

The Nord C2D features a greatly improved simulation of the characteristic mechanical key clicks that are a crucial component of the classic tone wheel experience and the amount can be adjusted to your taste.

The vibrato and chorus with the rotating scanner and its analog circuitry are also carefully modeled to be just as alive as the tone wheels and the Nord C2D features a redesigned percussion model that offers increased control over the percussion levels when playing near-legato.

FULL HANDS ON CONTROL

Having two sets of drawbars per manual and the new left hand drawbar preset panel makes using drawbars actively while playing a joy. The Nord C2D 61-key waterfall keyboard offers an ultra-fast response and has a firm mechanical action to provide you with the rock solid feel of an original vintage instrument... For increased ergonomics the panel and upper manual has been tilted slightly towards the player and the panel between the manuals have a smooth surface that’s easy on the hands when doing smears.
AMP SIMULATION

The mesmerizing sound of an accelerating Rotary Speaker spreading the sound around the room is an essential component of the tone wheel organ experience. The Nord C2D features 2 different Rotary Speaker simulations, one based on a 145 unit and a brand new simulation of a vintage 122-unit. There are three modes - Stop, Slow and Fast mode that can be controlled either with the onboard panel buttons, an optional foot pedal or the Nord Half-Moon Switch (accessory). The rotary speaker overdrive simulation has also been redesigned and adds an incredibly meaty roar to your sound. Naturally, the Nord C2D can also be connected to an external rotary speaker cabinet using the 11-pin Leslie* high voltage output or the high level ¼” jack output.

In addition to the Rotary Speaker model the Nord C2D also features great Twin and JC guitar amp models with a powerful overdrive, freely assignable to the B3, Farfisa or Vox organs. Add the 3-band equalizer, a feedback-delay with tap-tempo functionality, and several types of reverberation and you truly have an all-in-one effect section with stunning sound right out of the box.

VOX & FARFISA

The Nord C2D includes accurate models of the two most popular transistor organs of the 1960’s, offering you that massive savage sound created by their 12-top oscillator frequency-divider designs. With the C2D, you get the same dynamic behavior and unique response as in the original instruments.

The Farfisa* Compact Deluxe, considered by many to be the mother of transistor organs, involves routing matrixes and complex filter combinations that offer a tailored sound with massive energy and high-end. The Vox* Continental’s brute design brings you a more hollow tone, but still with a very intense character.

As with the tone wheel organ, both transistor organs have their own unique, irreplaceable personalities. Combine them with any of the Nord C2D’s speaker simulations, add some distortion, adjust EQ and they will definitely light your fire.
THE PIPE ORGAN

From the golden age of organ building we have carefully chosen a baroque organ with a devastatingly beautiful sound and wide range of expression for the C2D pipe organ part. Using cutting edge sampling technique, no efforts have been spared in producing the richest and most varied sound palette for the pipe organ player.

The Nord C2D pipe organ is built upon two basic types of organ pipes; flue pipes and reed pipes. The flue pipes have a softer timbre and the reed pipes a more nasal tone quality. For each keyboard division the player can choose from different sets of pipes and stops to produce different timbres. The C2D’s setup of stops make up a well-balanced blend of tonal qualities capable of expressing the most dramatic music to conveying the subtlest of organ pieces.

STOPS & COUPLERS

In the pipe organ each manual has its own sound; the Great division being the part of the organ with the majestic sound, whereas the Swell has a more mellow tonal quality. The Couplers are used to activate combinations of different stops from both manuals, so that pressing keys on one manual also connects stops from the other manual or pedal, making them sound as well.

</table>

The disposition has the fundamental tonal character of a baroque organ. The total number of stops is 21; 9 stops for every manual and 3 pedal stops (of which one is a combined Subbas 16 and Fagot 16). In addition to the three union couplers usually found in two manual organs, the Nord C2D features three octave couplers and a special coupler that adds the Pedal to the left most note played on the Great manual.

SWELL PEDAL AND TREMULANT

One of the crucial ingredients for creating a vivid sound is the swell pedal. In the Nord C2D this functions exactly as in the real-life models, giving the player intimate control over volume and dynamics of the swell manual. Another indispensable aid to make the pipe organ sound even a bit more vibrant is the tremulant. This is a function that basically gives small and very rapid variations in volume, thereby causing the sound to “tremulate”. The C2D provides two speeds, each with three variable depths.

IT’S NOT ONLY ABOUT THE MUSIC, IT’S ABOUT THE PLAYER

Not only does the C2D provide an extremely well balanced set of pipes, stops and couplers, but we have kept the setup close to reality for the pipe organ player to easily find his way around. The controls are exactly where you expect to find them.
PERFORMANCE AND CONNECTIVITY

With so many organ types at your disposal, it is vital to be able to route these to appropriate amplifier- and sound systems. The Nord C2D is equipped with a stereo output pair (L and R on 1/4" jacks) and a set of high level outputs (a 1/4" jack and a 11-pin Leslie* connector). This provides you with the flexibility to e.g. route the tone wheel to a rotary speaker and the pipe organ to a PA.

A swell pedal is a crucial tool for expressiveness with any organ and the Nord C2D is of course capable of using any good quality expression pedal.

A dual manual organ would not be complete without the ability to play bass notes on a pedal board. The Nord C2D includes two additional bass register drawbars with selectable timbre from vintage tone wheels, pipe organ bass stops or a synth bass, modeled after a famous vintage add-on unit. The bass section can be played with any MIDI-equipped bass pedal board connected to the dedicated Bass Pedal MIDI input, or by splitting the lower manual.

MIDI connectors allow you to use the Nord C2D to control other MIDI equipment or to use it together with a computer or sequencer, and the two manuals and the optional pedal can all be set to transmit on separate MIDI channels.

OPTIONAL ACCESSORIES

KEYBOARD STAND ALU

The Nord C2D can be used with the Keyboard Stand ALU, a very sturdy but lightweight stand made of aluminum. This stand is specifically designed to make room for a large set of pedals underneath.

MUSIC STAND EX

The strong, metal Music Stand EX attaches to mounts included on the back of your instrument, and can accommodate four sheets of music. The stand is easily mounted without the use of any tools, and can be fitted in the gig bag for transport. Dimensions: 70 x 25 cm (27.6" x 9.8").

SOFT CASE

Having three vintage organs and a baroque pipe organ in your studio is fun, but it’s even better when you can easily carry them with you to a gig. That is why the Nord C2D is lightweight and portable. With the optional soft case, you can carry the massive power of these monster organs in one hand; weighing in at merely 15.5 kg (34 lbs).

HALF MOON SWITCH

With the Half Moon Switch you can control the speed of the built-in rotating speaker simulation as well as an external rotary speaker connected via the 11-pin Leslie* connection. The Half Moon Switch offers 3 speed settings (slow - stop - fast) and is easily attached without the use of any tools at various locations along the left side of the lower manual.

LIGHTWEIGHT

The Nord C2D is lightweight and portable, yet sturdy enough to cope with the rigors of the touring life. The total weight is merely 15 kg (33 lb).
PEDAL KEYS 27
This MIDI pedal board has 27 keys and an integrated Swell pedal, with a sturdy chassis of aluminum. The long keys have a wooden finish and a length of 350 mms, to facilitate the use of a proper toe-heel technique when playing. Just connect it to the C2D’s Bass Pedal MIDI Input and you are ready to perform. It is very portable weighing in at only 15.5 kgs, 34 lbs. (Optional accessory).

General
- LCD Display
- Master Level Control
- 2 Drawbar sets per manual
- Pedal drawbars
- 126 Program Locations
- 2 Live Buffers

Organ Section
- 4 Organ Models:
  - Pipe Organ
  - Classic Tone wheel Organ
  - Vox® Continental Transistor Organ
  - Farfisa® Compact Deluxe Transistor Organ
- Percussion Controls
- Vibrato / Chorus / Tremulant Control
- 6 Drawbar Presets per Program Location

Effect Section
- 3-band Equalizer
- Overdrive
- 3 types of Speaker Simulations including two Rotary Speaker models (122, 122 Close and 145) with selectable speed (slow - stop - fast)
- Delay - with feedback and tap-tempo function
- Reverb - 6 algorithms

Keyboard
- 2 x 61 Semi-Weighted Waterfall Keys

Connections
- Stereo Headphone Output
- 2 Line Level Audio Outputs
- Monitor In
- 14V RMS High Level Outputs: 11-pin Leslie® Standard Connector
  - Quarter Inch Connector
- Sustain Pedal Input
- Rotary Control Input
- Swell Pedal Input
- MIDI In
- MIDI Out
- Bass Pedal MIDI In
  - USB - type B connector

Included Accessories
- Dust Cover
- User Manual
- Power Cord
- Nord CD-ROM

Dimensions
- C2D: 966 x 163 x 445 mm (38.0 x 6.4 x 11.3’’)
- Pedal keys 27:
  - 1055 x 320 x 620 mm (41.5 x 12.6 x 24.4’’)
  - with the swell pedal mounted in place.

Weight
- C2D: 15.5 kg (34 lbs)
- Pedal keys 27: 15.5 kg (34 lbs)

GREAT SOUNDS DON’T COME CHEAP, THEY’RE FREE

We spend lots of time and tons of money to keep our sound libraries constantly expanding... Then we give them away as free downloads at nordkeyboards.com

Nord Piano Library

ORIGINAL SOUNDS FOR FREE

Compatible with
Nord Electro 3/4
Nord Piano 88/2
Nord Stage/EX/2

The Nord Piano Library is a specialized library for acoustic and electric keyboard instruments and incorporates a number of unique technologies in order to create the most realistic reproductions of the original instruments. The library contains a wide selection of multisampled upright and grand pianos, vintage electric pianos, harpsichords and clavinet – all carefully selected for their unique characters.

Nord Sample Library

ORIGINAL SOUNDS FOR FREE

Compatible with
Nord Electro 3/4
Nord Piano 2
Nord Stage 2
Nord Wave

The Nord Sample Library focuses on versatility and consists of a broad range of quality sampled sounds, from raunchy accordions, naïve string machines to guitars and brass. To ensure the highest quality possible, we have teamed up with renowned sample content creators like Kirk Hunter Studios, Precision Sound and Sonic Reality. Also, you get the exclusively licenced original sounds from the legendary vintage tape-samplers Mellotron and Chamberlin!
ITALIAN GRAND
The Italian Grand is medium sized Grand Piano brimming with character. It can be described as slightly ambient, brilliant and boasts an amazing dynamic range.

BRIGHT GRAND
The Bright Grand is a 6’3” (191 cm) Concert Grand Piano with a transparent character and an expressive dynamic range. We chose to record a factory new unit and this further adds to a crisp, rich tone.

GRAND IMPERIAL
An Austrian giant with a powerful sound board and a high proportion of mountain spruce from the Alps. The sound of this Grand Piano is almost orchestral, with an exquisite full tone that is somewhat dark in character. Also available in a stunning XL-version!

GRAND LADY-D
This German 9-foot beast captures the full sound from the tapered, double crowned sound board and every nuance resonating in the huge maple body.

STUDIO GRAND 1
The recording of the Studio Grand was done with a close-up microphone positioning to provide you with a very projective character.

STUDIO GRAND 2
The Studio Grand 2 is a meticulously prepared grand with a sonic response from the very softest pp passages to a strong FF presence.

CONCERT GRAND 1 CLOSE
This mighty grand was captured with the microphones positioned close to the strings providing the ideal sound when you wish to add your own choice of ambience or performing live.

CONCERT GRAND 1 AMB
A grand piano with the preferred placement of the microphones, for a classical performance. The ambience is the grand piano itself interacting with the acoustics of the concert hall.

MELLOW UPRIGHT
This Upright was fitted with extra soft felt hammers to accommodate a more mellow, dampened tone. With its gentle dynamic response the Mellow Upright is a unique addition to our Nord Piano Library, and a real gem if you have a preference for a calm, dreamy and rich feel.

GRAND UPRIGHT
The Grand Upright offers a remarkably full and even sound. It has a rich, woody tone that gets a brilliant glassy bite when you lay some force into the keys.

BLUE SWEDE UPRIGHT
The Blue Swede is a tall upright from a Swedish piano manufacturer with a reputation for building great instruments.

QUEEN UPRIGHT
The clear, sustaining sound is typical for this upright, reflecting the selected materials and excellent finishing of the original instrument.

ROMANTIC UPRIGHT
The touch and tone of the Romantic Upright are harmonized perfectly from the powerful bass notes up to the sparkling treble register.

HONKYTONK UPRIGHT
With nails replacing the traditional felt hammers, this piano most certainly has a sound of its own.

BLACK UPRIGHT
The hammers on the original piano are voiced for a soft tone; a characteristic for these upright pianos that the Nord Piano Library version truly reproduces in great detail.

RAIN PIANO UPRIGHT
Upright piano manufactured by the Swedish Piano Factory, carefully tuned to sound like a typical “parlour” piano. The recording was done with a close-up microphone positioning.

SALOON UPRIGHT
Look no further for a great, ragtime and boogie’ing personality. The Saloon Upright is heavily de-tuned, do not sit with your back towards the door.

FRENCH HARPSICHORD
This is a triple stringed French harpsichord, recorded in various settings at the Swedish National Radio.

ITALIAN HARPSICHORD
This instrument is a beautiful Italian double strung harpsichord, recorded at the Swedish National Radio.
ELECTRIC GRAND CP80
The touring and recording Electric Grand from the 80’s, with a very characteristic sound. The leather hammers, short strings and the lack of a resonant body helped to produce a unique sound.

ELECTRIC GRAND MODEL G
This is a one of a kind custom modified Gärtstedt acoustic grand piano fitted with CP-80 pick-ups.

ELECTRIC GRAND AMPED
This Electric Grand was recorded through a magic mix of custom built pre-amps, tube amps and vintage outboard. Available in two sizes. A small mono version and a medium in stereo.

EP TINES 1 MK I DEEP
Manufactured in May 1978 and adjusted to “deep timbre adjustment” which gives the piano a warm sound with a rich fundamental.

EP TINES 2 MK I SUITCASE
Manufactured in January 1975. We fine-tuned the mechanics and adjusted the tines according to the “ideal” timbre adjustment.

EP TINES 3 MK II
Manufactured in April 1981 and adjusted to “shallow” timbre.

EP TINES 4 MK V
Manufactured in June 1984 and adjusted to ‘ideal’ timbre. The sound of the Mark V offers improved clarity in the upper range, better consistency of tone in the low range and increased sustain.

EP TINES 5: BRIGHT TINES
We prepared our magnificent 1975 mk I Suitcase with a special selection of hard hammer tips in certain ranges, an adjustment of the striking line and re-voicing of the harp, in order to get “that” bell sound.

EP TINES 6: SPARKLETOP
All the tine based electric pianos manufactured during the period of the late sixties featured wooden piano hammers (felt-covered, teardrop shape) and non-tapered Raymac tines. This combination produced the raw, bell-like sound heard on many famous recordings.

EP TINES 7: TINES AMPED
This MK1 was recorded through a magic mix of custom built pre-amps, tube amps and vintage outboard.

EP REEDS 200 A
Some say that this fat reed-sound of the Wurlitzer 200 A fits better in a pop- or guitar-oriented setting than the tine based electric pianos.

CLAVINET
The Clavinet is represented with all the 4 possible pick-up selections from the original.

The Nord Piano Library is compatible with:
Nord Electro 3 and 4, Nord Piano 1 and 2, and Nord Stage Classic/EX/2.
Nord Sample Library

ORIGINAL SOUNDS FOR FREE

CONTENTS

CHAMBERLIN • MELLOTRON • STRINGS/STRING MACHINES • WIND/BRASS • TUNED PERCUSSION • ACCORDION/ORGANS • GUITAR/BASS • VOICES • ACOUSTIC/ELECTRIC PIANOS • SYNTH

ORIGINAL SOUNDS

The Nord Sample Library contains over 900 of the best sounding samples on the planet, no matter if it is acoustic or electric sounds that you are interested in.

In order to provide you with the best quality, we have teamed up with top-notch sample content creators like Kirk Hunter Studios, Precision Sound and Sonic Reality. New Samples are added to the Library on a regular basis and are made available as free downloads in the Library area on the www.nordkeyboards.com website. The extensive Sample Library pages also include complete lists of the samples and audio demos.

NORD SAMPLE EDITOR

The Nord Sample Editor is an application for Mac and Windows for creating your own sample instruments and transferring them to the sample memory area of your Nord instrument.

The Sample Editor can assist you in the process of creating your own sample instruments, help you setting start points, loop points and other tasks that are essential for making the samples ready for use in the Nord unit. The Editor can also automatically map a selection of audio files across the keyboard. Read more on the www.nordkeyboards.com website.

The Nord Sample Library is compatible with:
Nord Electro 3 and 4, Nord Piano 2, Nord Wave and Nord Stage 2.

### Exclusive Nord Licensing:
**THE MELLOTRON LIBRARY**

Although the Mellotron had been used earlier by some British bands, the song Strawberry Fields Forever by the Beatles (Flute) and Nights in White Satin by the Moody Blues (3 Violins) in 1967 became the first Mellotron “hits” both in Europe, the US and the rest of the world, forever making a mark in music history.

The M400 was used on the road and in the studio during the 1970’s by Led Zeppelin, Pink Floyd, Genesis, Yes, Deep Purple, Aerosmith, Wings, David Bowie, Kraftwerk and many others. Through the extremely successful music of these groups and artists the Mellotron sound has been widely spread, and even though most people don’t know that it’s a Mellotron, they’ve surely heard the sound.

During the 80’s the Mellotron remained virtually unused. Most notable exceptions are Talk Talk in Life’s What You Make It and OMD’s Enola Gay and other songs by these bands.

The Mellotron experienced a renaissance during the 1990’s when numerous bands and artists like Red Hot Chili Peppers, Lenny Kravitz, Oasis, Radiohead, Air, Monster Magnet, REM and Manic Street Preachers began reusing it. In the new millennium the Mellotron has already gained even more popularity and has been used on hits by Dido, Nelly Furtado, Daniel Powter, Robyn, The Black Eyed Peas and The Strokes to name a few.

Read the Mellotron history at nordkeyboards.com/mellotron

The Mellotron sounds can be downloaded for free from www.nordkeyboards.com

Mellotron is a registered trademark of Mellotron.com. All other trademarks mentioned in this publication are the properties of their respective holders.

---

60 MORE UNIQUE MELLOTRON SOUNDS AVAILABLE AT nordkeyboards.com/mellotron

To celebrate the 50th anniversary of the Mellotron, we are releasing 60+ unique new sounds and rhythms from the original Master Tapes used to create the famous Mellotron sounds.
Exclusive Nord Licensing: THE CHAMBERLIN LIBRARY

“We are very happy to offer the Chamberlin Library to our Nord keyboard players”, says Clavia CEO Hans Nordelius. “It is a natural progression of the previously released Mellotron Library, which has been much appreciated by our Nord Wave and Nord Electro 3 users.”

The Chamberlin was the original tape replay instrument, developed and patented by US inventor Harry Chamberlin from 1949 to 1956, when the first commercially available model was introduced. Various models and versions of these extraordinary music instruments were manufactured until 1981. During the years of production the much-respected Chamberlin sound library grew, and the licensing deal with Clavia includes 60 sounds. The extraordinary Chamberlin Music Master was instrumental in the birth of the later Mellotron.

The Chamberlin was a constructional beast with magnetic tapes (also used in recording studios) containing analog recorded sounds, triggered by the keyboard. One tape per key! Once reaching the tape end which was normally after about 8 seconds of playing, the sound would stop and tapes would need to mechanically rewind.

Even with quite limited sound quality prestanda and obvious limitations in tone length the Chamberlin tape samplers turned into precious pieces of hardware used by major artists and bands all over the world.

During the production years close to 700 units were made, all considered a real work of art and a true milestone when it comes to musical instrument innovations.

The Chamberlin library has been digitized in a 44.1 kHz, 24-bit resolution and is available in the Nord Sample Library format (nsmp), to be used with our Nord Sample Library compatible units. As always, all the sounds in the Nord Sample Library created by Nord are available as free downloads from the www.nordkeyboards.com web site.

Sounds from the Chamberlin can be heard on countless songs by artists like David Bowie, The Moody Blues, Crowded House, Richard Thompson, Beck, Mitchell Froom, Tom Petty, Elvis Costello, Neil Finn, XTC and Tom Waits, just to name a few.

Read the Chamberlin history at www.nordkeyboards.com/chamberlin

The analog Chamberlin master tapes have been transferred to the digital domain using state-of-the-art recording equipment, in a 44.1 kHz, 24-bits resolution. All the sounds have been edited and carefully looped – when applicable - using the Nord Sample Editor. One thing that is very noticeable is the quality and fidelity of these sounds.
