Guide

22590 - Mono - "112APC"

Mainly used as **Line Outs** on "**older**" products (pre 2011) and for the Sustain/Rotor jacks. (NE/NE2/NE3/NE3HP, NS/NSEX, NL/2/2x/3, NP, C1/C2, NW, NM/NMG2)

22600 - Stereo - "112BPC"

Used for Headphones on all products and **Line Outs** on "**newer**" products (post 2011-, NE4/5, NS2, NP2, C2D, NL4) Even though this is a "stereo jack", the Line Outs are still handling mono signals.

22610 - Stereo/Break - "114BPC"

Mainly used for Control/Swell functions on various products, but also as the sustain jack where the **Nord Triple Pedal** is used (NE5/NE6/NP/NP2/NP3/NP4/NS2/NS2EX/NS3).

25578 - Mono/Stereo/Break/AllPurpose

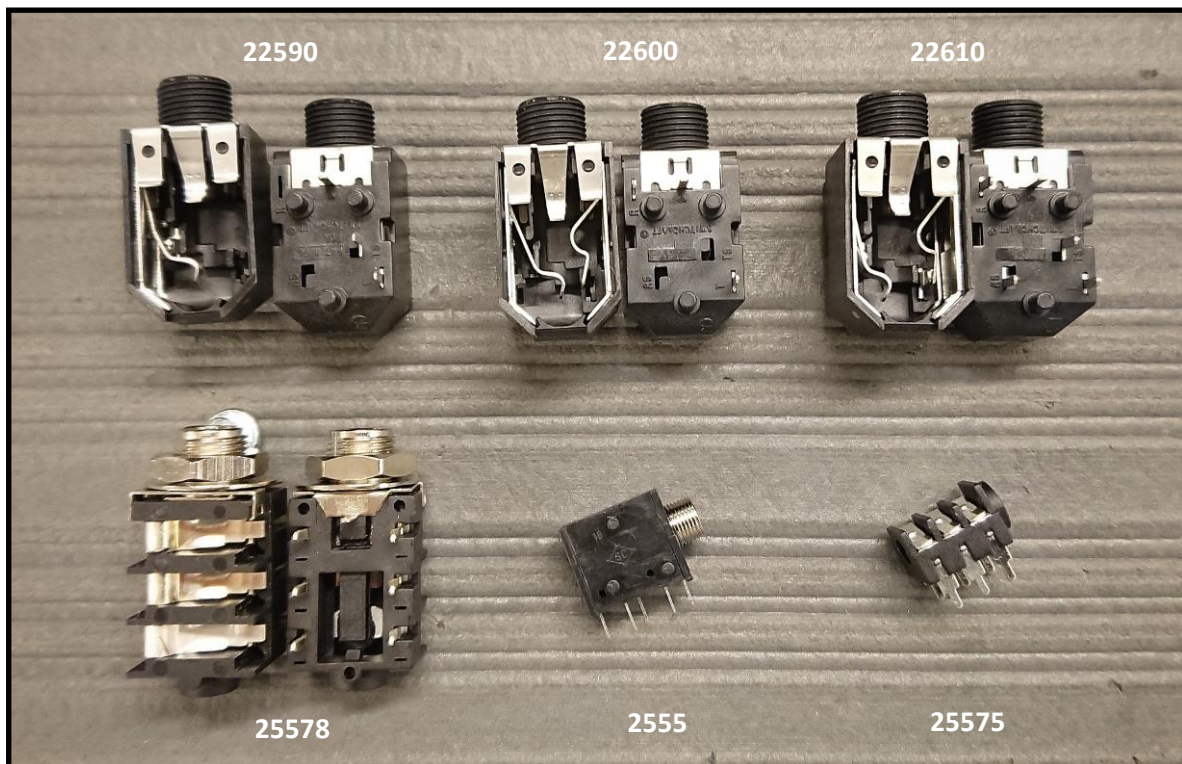

New jack used on the NP4v2, NG and NW2 mainboard. This "AllPurpose" jack is used on all positions instead of three different types on the previous mainboard revision.

25554 - Stereo/Break - 3.5mm Monitor In

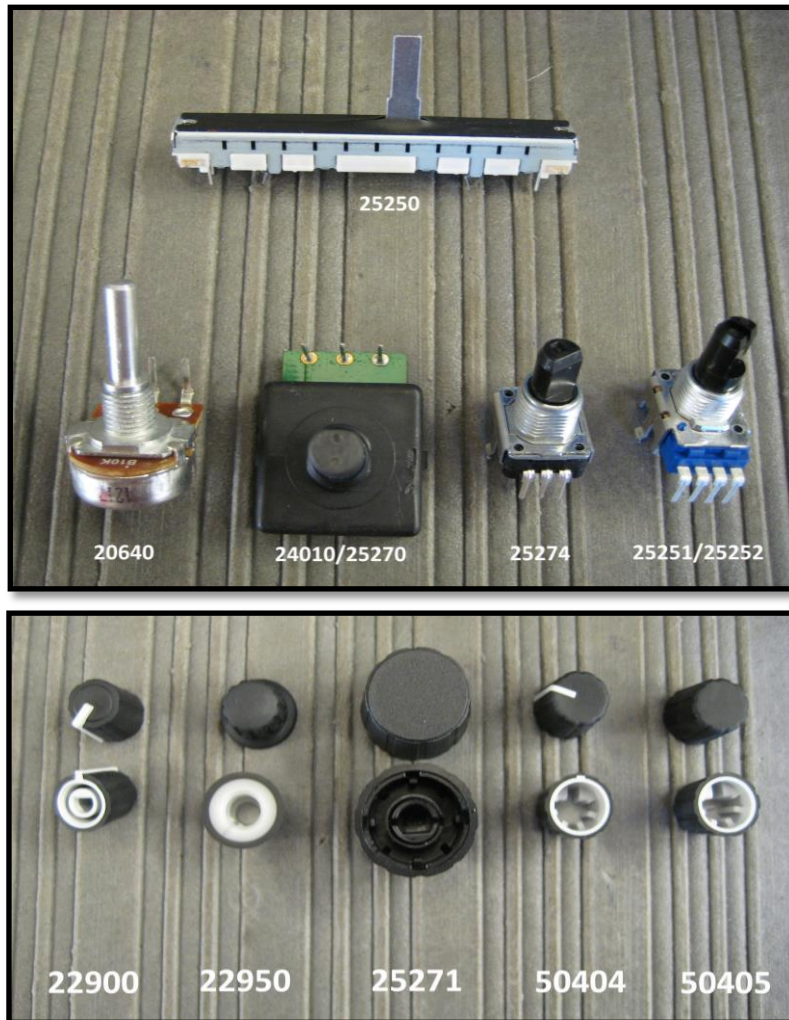

Introduced on the NE3 range and used on most products today, except on NL4 and NLA1.

25575 - Stereo/Break - 3.5mm Headphones (ND3P)

Ser# DH10986 and below, uses a temporarily (no official part#) 3,5mm jack, patched to the mainboard with cables. From ser# DH10987 and forward, the 3,5mm connector (25575) is mounted on the mainboard.

Encoders, pots and knobs

		SEK	USD	EUR

25275**	Knob for 25274 (ONLY ND/ND2!!!)	0	0	0
50404	Knob for 25251/25252 (ND2/NE5/NE6/NL4/NP2HP/NS2EX/NS3)	7	1	1
50405	Knob for 25274 (ND/ND2/NE5/NE6/NL4/NS2EX/NS3)	7	1	1
25281	Knob for Half Moon switch	27	2	2
40813	Knob for Drawbar NW2	5	0	0

* NM and NL3 used an older type of encoder that is NLA. 25270 requires some adjustments of the pins when installing it in a NM/NL3, though is fully compatible with the older type.

** 25275 is very similar to 25271, but have a slightly bigger hole for the larger axis on 25274.

Mod wheel pot

Part#23041, the mod wheel pot, used in all Nord Leads and Nord Stages since "day one", is changed from BOURNS to ALPS in new production. The change is valid on products (NLA1/NL4/NS2) made in September 2014 and forward.

The part# on the ALPS pot is **25254**.

The Bourns pot part#, without cables, is **20680**.

Due to the mechanical changes *the old BOURNS type can't be replaced by the newer ALPS model*.

The new mechanical parts, with part#, are shown above.

When ordering the mod wheel pot, make sure which type that is mounted in the unit.

When ordering the old mod wheel (40008), we will ship the whole mod wheel kit, including bracket and pot (25254+40559+40557).

23041 is also used in the CV-pedal (mounted on the PK27) and will continue so.

Boards written in red are recommended to send to CLAVIA for service, please contact service@clavia.se for further assistance.

Except for NL2X/NR2X units made before January 2010, 61093/94/95 are equivalent to the previous 69183. For NL2X/NR2X made before January 2010 - continue to use part#60074.

* Part# 61093/94/95 are used in the NS2-series and replaces the previous model part#69183, also found in the discontinued products C1/NE3/NMG2/NMG2X/NS/NSEX/NS2/NW. Only part#61094 is used today.

** Part# 60231 mounted in the NS2EX/NE5/NE4/NC2D/NP2/NL4/NLA1 are shipped with a 3 pin IEC connector type from November 2012 and forward. A two pin version was previously used.

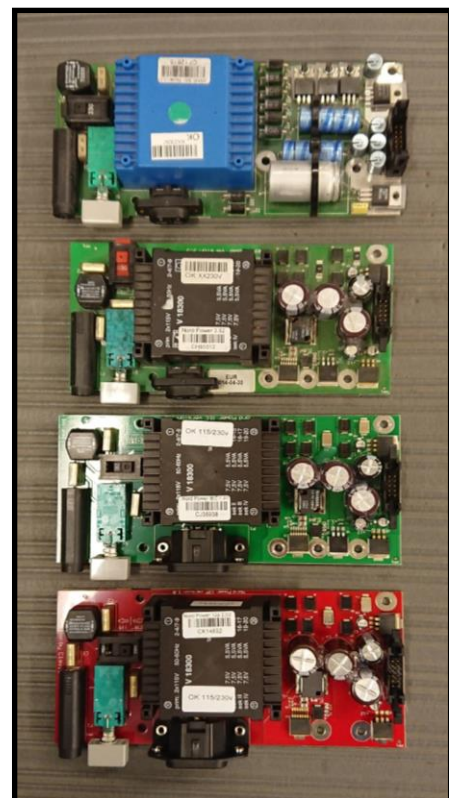

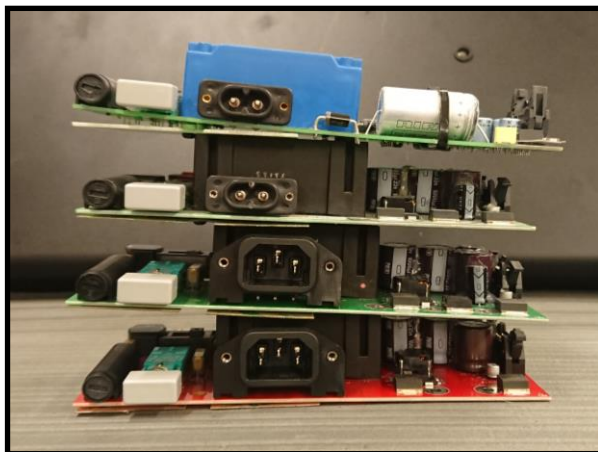

*** When used for PK27s, the 12V version is only compatible after ser#10733. For older units use +9VDC with grounded center pin.
